

Toward Decentralization, Equity and Balance

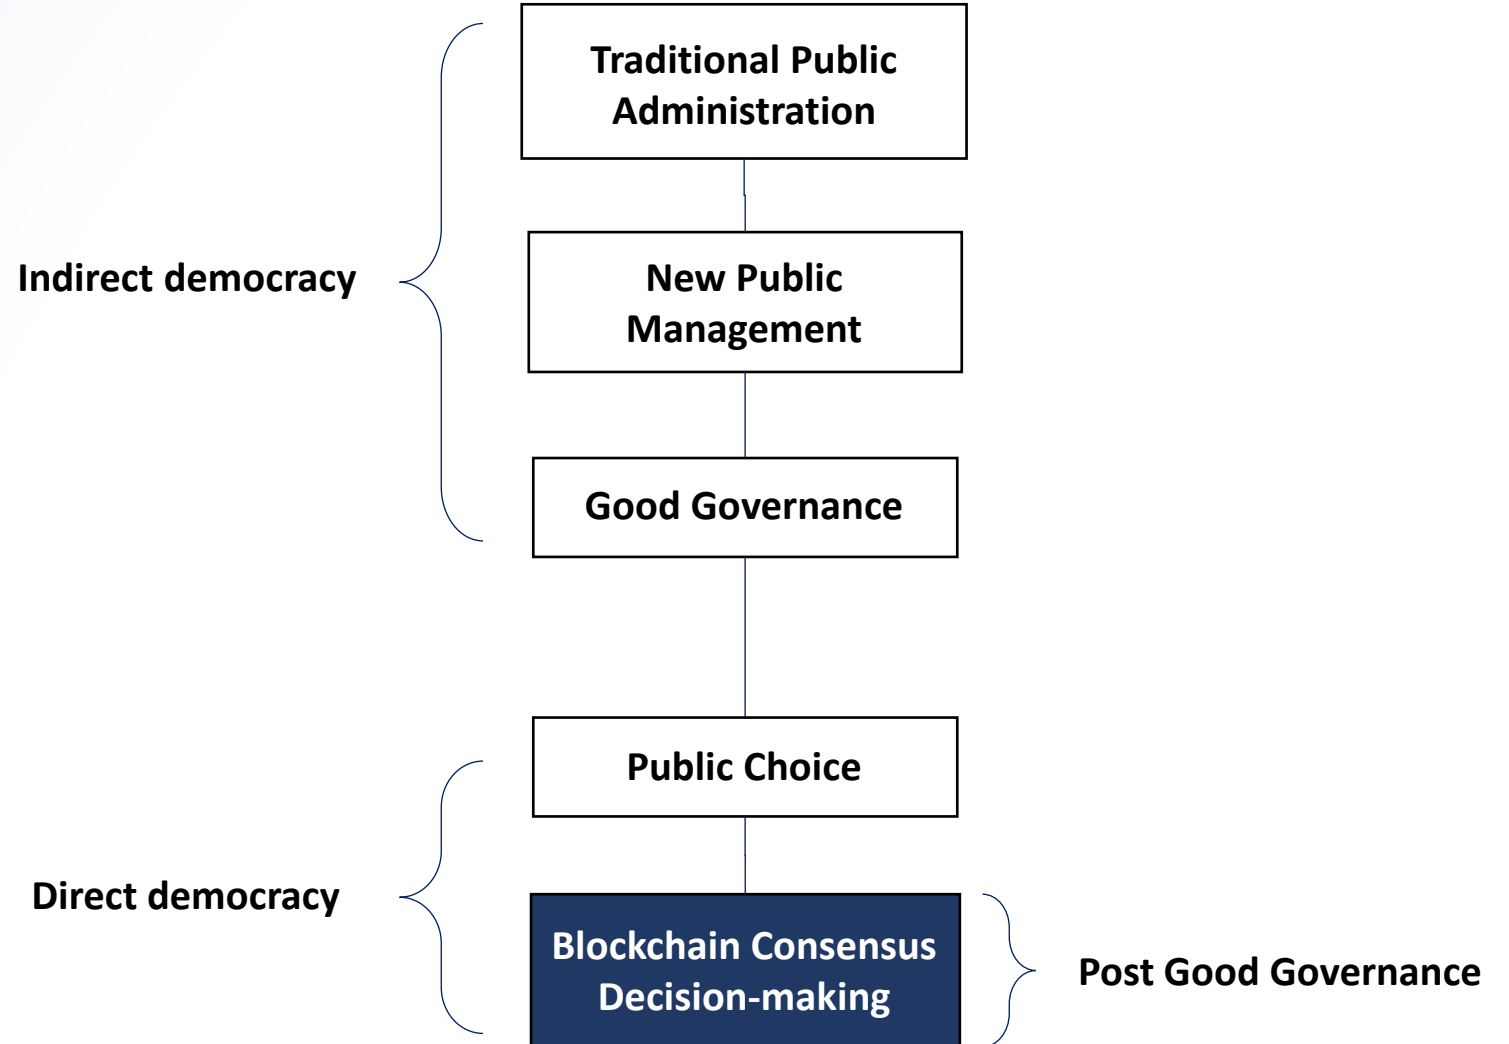

Cryptostone

Cryptostone is a disruptive innovation and a fully anonymous and No KYC financial blockchain ecosystem

The Paradigm Shift Towards Decentralization:

The theoretical fundamentals of Cryptostone blockchain ecosystem

According to public choice perspectives, government agents act as individuals responding to incentives, much as actors within a market.

This reduces the effectiveness of indirect democratic systems.

The people in power would have us believe that this system is natural and inevitable but better alternatives to the current system are already here.

Currency is a creature of law, government control over money can be a form of oppression.

Bitcoin is nothing less than a fundamental assault on the idea that a law of currency is a necessary prerequisite of modern monetary order.

The theoretical fundamentals of Cryptostone blockchain ecosystem

Centralization disadvantages:

- Regulatory capture
- Corruption
- Rent-seeking efforts
- Government intervention in markets
- Monopolies:
 - Coercive monopoly
 - State monopoly
 - Legal monopoly
 - Government-granted monopoly

Decentralization benefits:

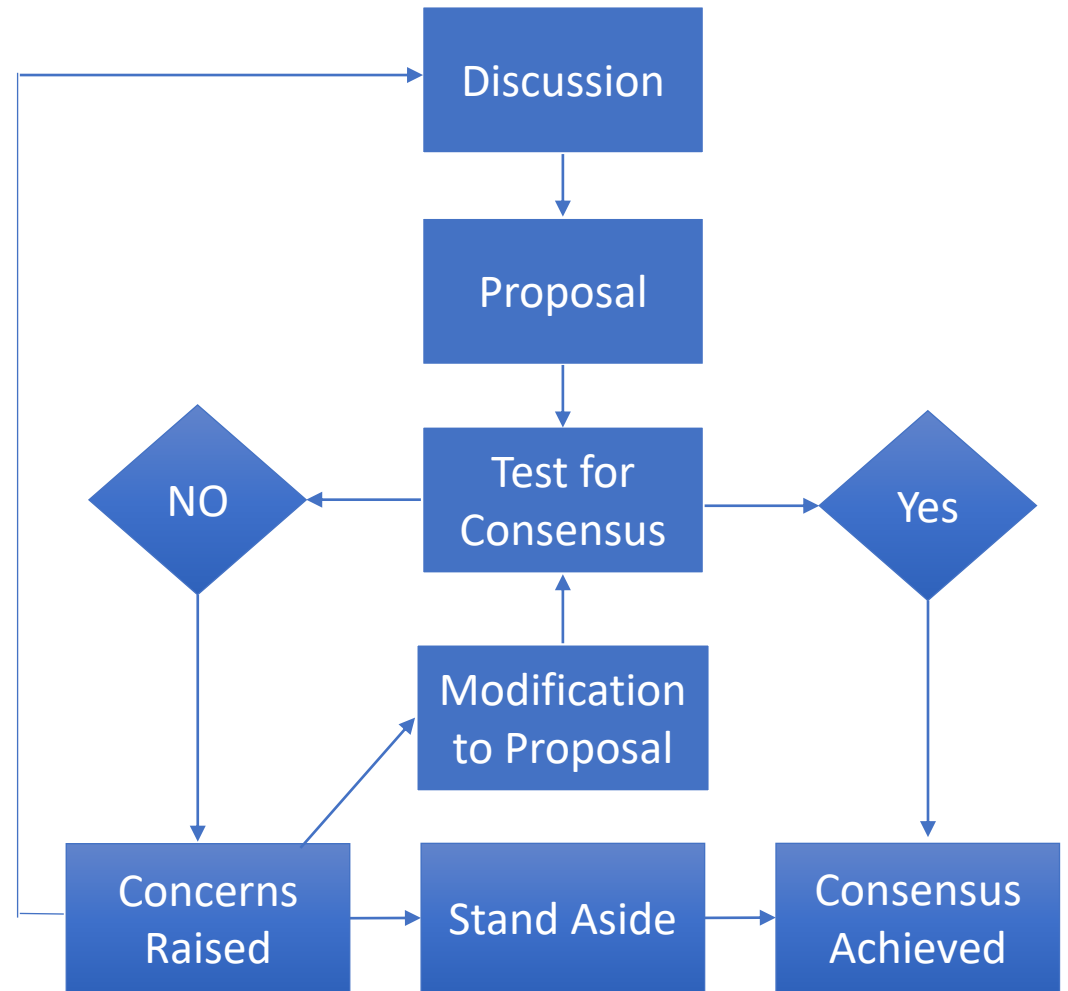

- Anti Corruption
- Transparency
- Free economy
- Free markets
- Helps **peace** by preventing the concentration of power
- Prevents monopoly
- Fair competition

Consensus decision making

Consensus decision-making is a process that builds trust and creates ownership and commitment.

An effective consensus process is inclusive and engages all participants.

Consensus decisions can lead to better quality outcomes that empower the community to move forward to create their future together.

Consensus decision making

Blockchain Consensus decision-making principles:

- Before voting in a public space, everyone can comment and express their opposition and agreement
- Our role as a facilitator
the role of the facilitator is to help make the process of reaching a consensus decision easier
- As many stakeholders as possible should be involved in the consensus decision-making process to protect from attacks
- Rewards for maximum stakeholder participation
- Proof of Importance Consensus based on time and stake

Consensus decision making risks:

Eclipse attack ○

Sybil attack ○

51% attack ○

Benefits of consensus decision-making:

01

Inclusive participation engages and empowers the community

02

Requires a commitment to work together and increases cooperation

03

Equalizes the distribution of power and resource in a community

04

Can create better decisions that are more representative of the larger community

05

Creates more ownership and commitment

06

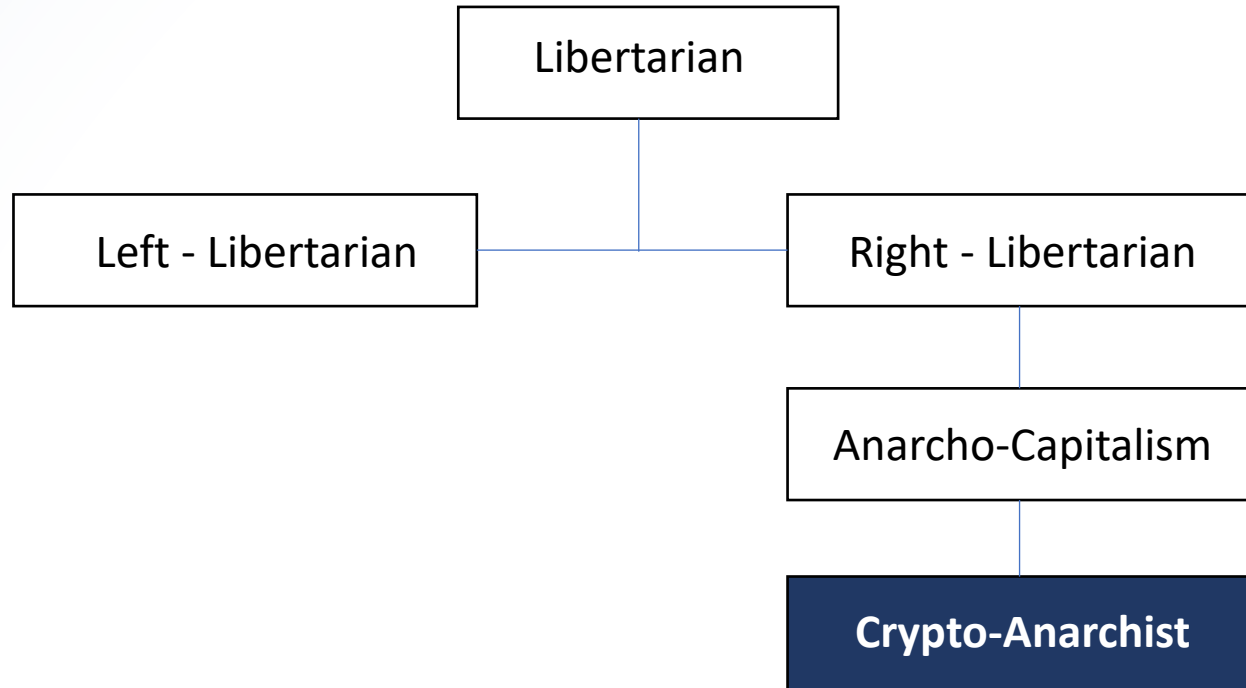

Results in more effective implementation because the entire group takes action on the project or plan

07

Protects minority needs and opinions

Who we are:

Our Manifest

The world of central decision makers is coming to an end and decisions must be made by consensus and freely, We are against **governments, banks and stock exchanges.**

We should not wait for the wave of change, We do not want to wait for the wave of changes to pass over us, we want to be **Mainstream**

Our Way (Our Mission):

Toward balance and equity in access to modern global financial services by decentralizing and eliminating cumbersome, slowing, and restrictive governments, banks, and stock exchanges rules.

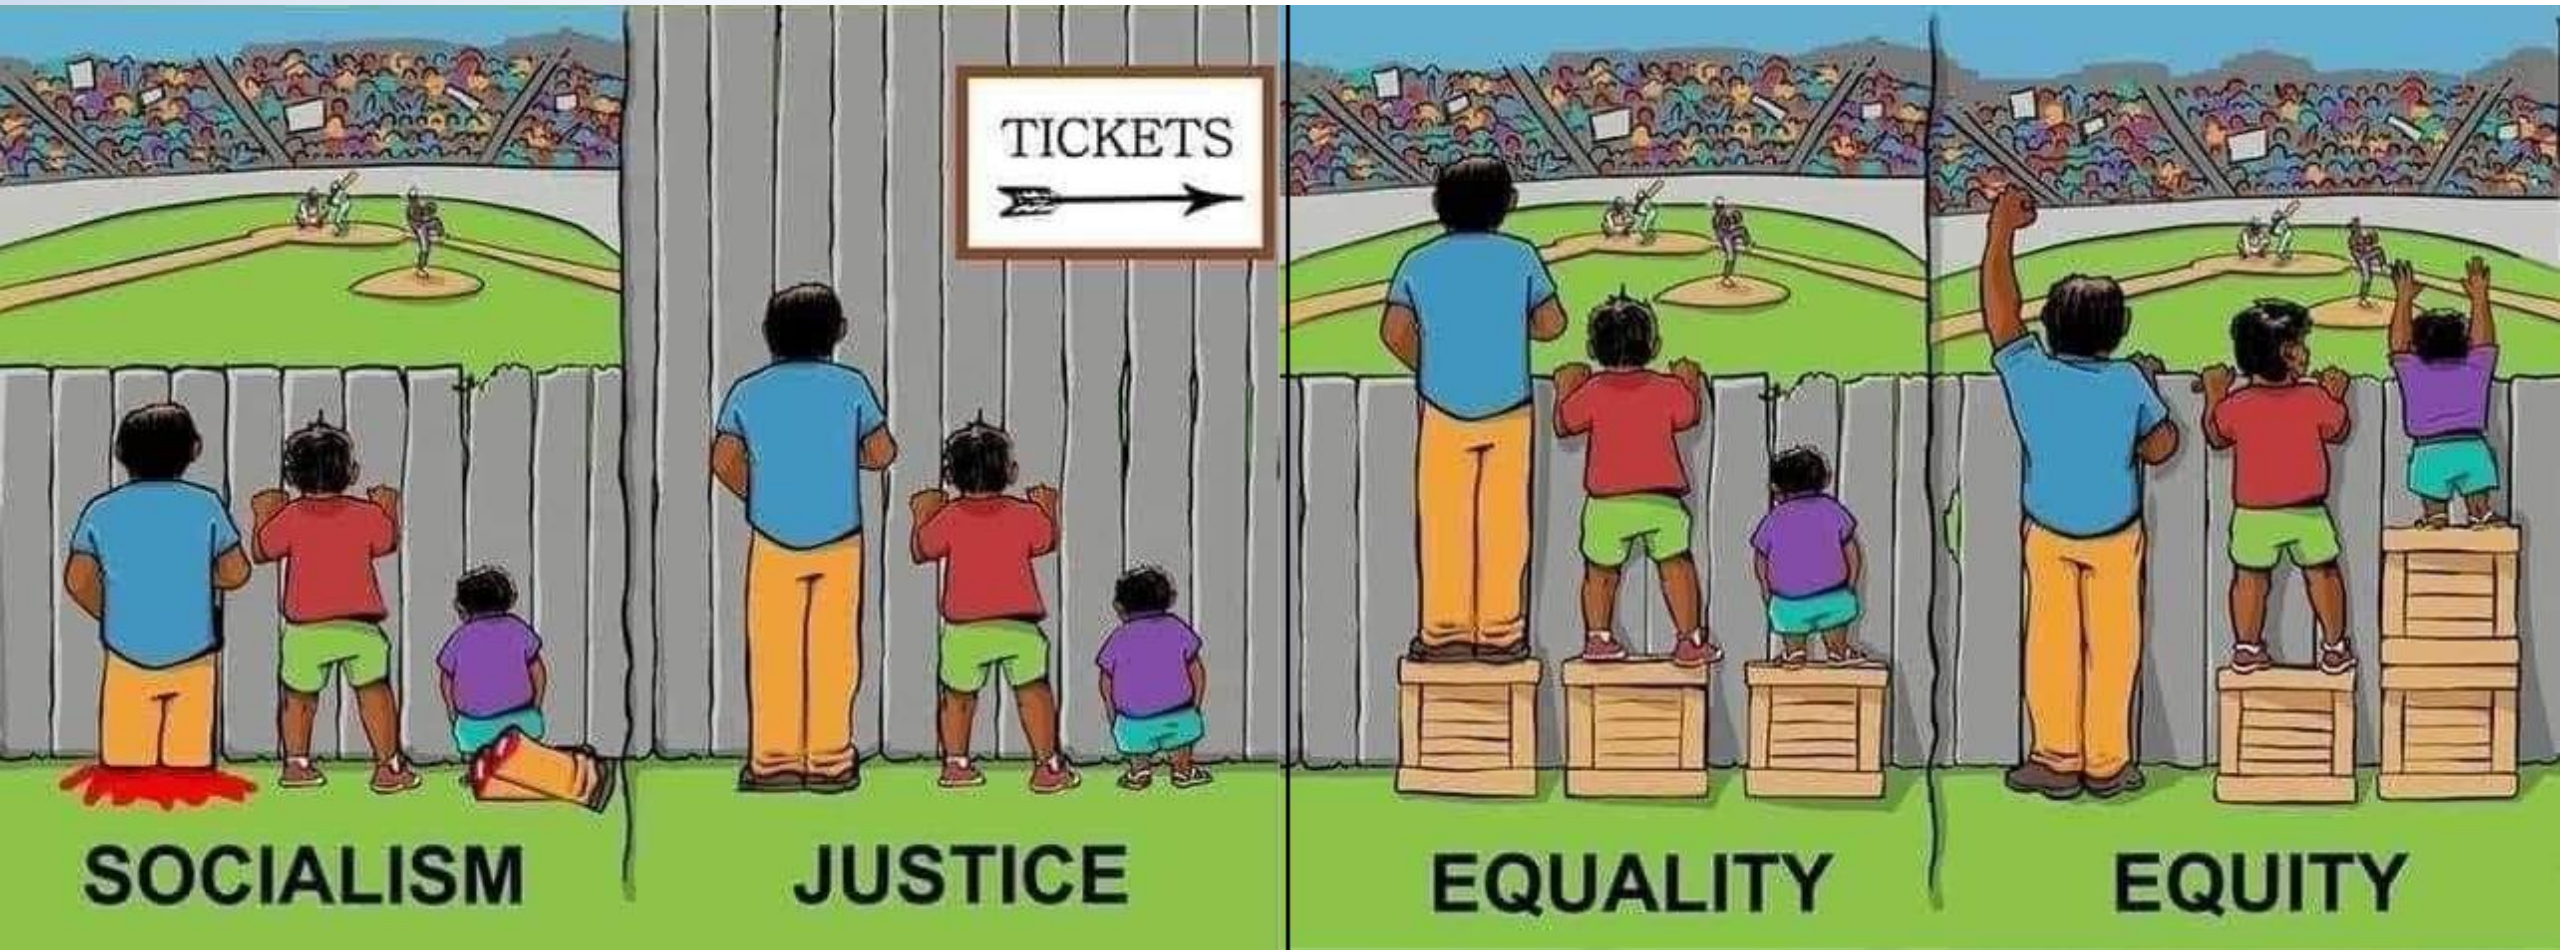

The Future

*We are
crypto-anarchist*

NEXT EXIT

What is Equity: (Our mission)

Problem:

Unbanked

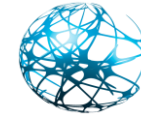

- More than 2bn Unbanked or Underbanked in 140 countries: including 1/3 of US.s and more than 2.7mn in UK Housewives, Youth, Immigrants and many more

- Blockchain utilities are not yet truly decentralized: governments can restrict or limit them by law enforcement.
- Centralized decision makers.
- Financial monopoly held by the administrations and banks.

- Cryptocurrencies are more assets rather than payment tools

- Cross-border payments restrictions, limitations and costs:

Foreign merchants, Foreign labor remittance, Tourists, Freelancers and Remote workers, SMEs, Tele shopping and payments. SME needs of cross border payments are largely unmet by traditional systems

- **Reveal identity:** More than 1bn in the world don't like (but have) to provide their private financial information for banks and governments, due to the lack of alternatives.

- Fund and capital raising problems and limitations:
- Cross-border stock investment restrictions

Solutions:

Decentralized and P2P services without third parties:

No centralized decision making as a paradigm

Simplified fund and capital raising and investment:

Decentralized cross-border stock market and security token crowdfunding marketplace. Facilitating foreign stock investment. Capital knows no border.

Providing easy, fast and reliable cross border payment solution:

Global financial services in a decentralized world to more than 2bn Unbanked and Underbanked people in Cryptostone financial ecosystem without traditional financial systems limitations.

Increase the number of crypto payment gateways:

By providing easy and fast payment gateway service for SMEs at a lower cost than traditional payment gateways to convert cryptocurrencies to payment tools

Merchants benefit from crypto payment and instant solutions:

They are enabled to receive new income streams

Disruptive innovation:

Increase user satisfaction by eliminating local laws and going beyond national borders

Anyone, anywhere:

No-KYC and anonymous services.

Products:

Decentralized Worldwide Security Token Stock Market (Security Token Marketplace):

Global security token offering and trading platform which makes fundraising and investment process inclusive and accessible based on **decentralized listing & delisting By blockchain consensus.**

ICO Launchpad:

A blockchain crowdfunding platform on which users can buy ICO tokens and coins with fiat or other cryptocurrencies. This platform supports automatic distribution mechanisms and crypto payment gateways.

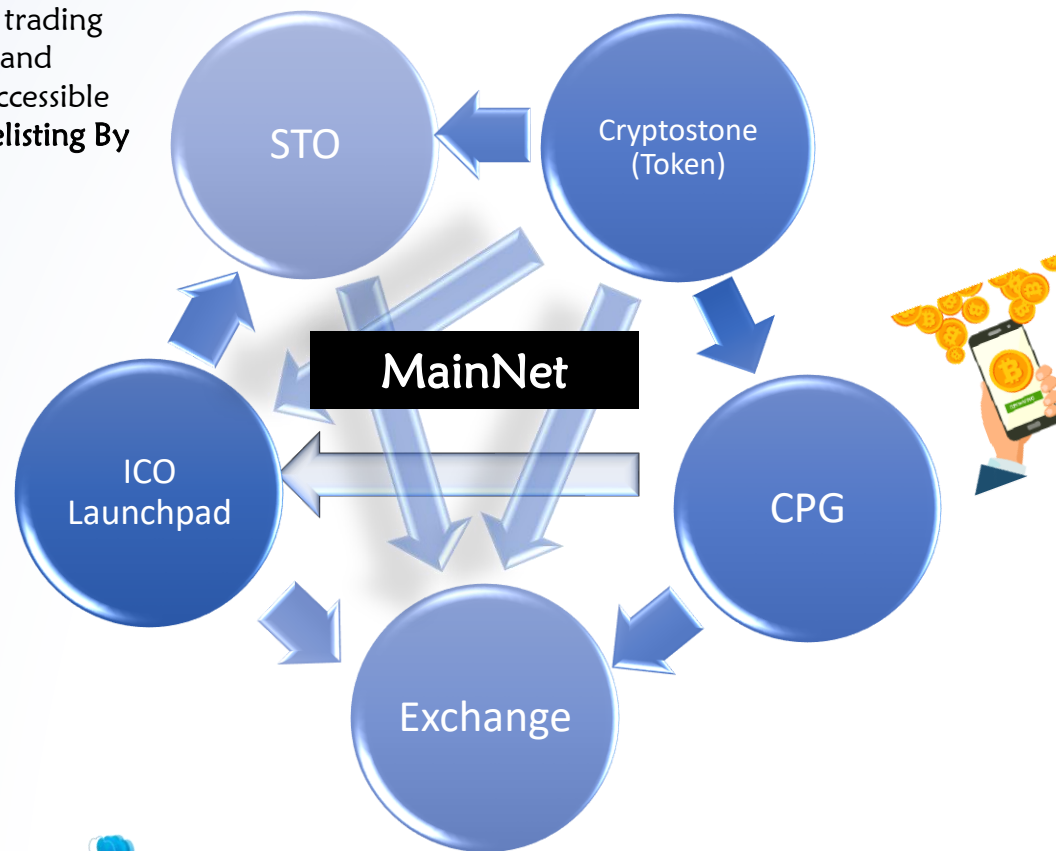

Other Utilities:

- Tokenizing assets
- NFTs
- Smart Contracts

Cryptostone Coin (Token):

With our coins, people pay less for financial transactions in Cryptostone eco system

Crypto Payment Gateway (Anonymous CPG):

Our crypto payment gateway will remove cross-border restrictions

Other Products:

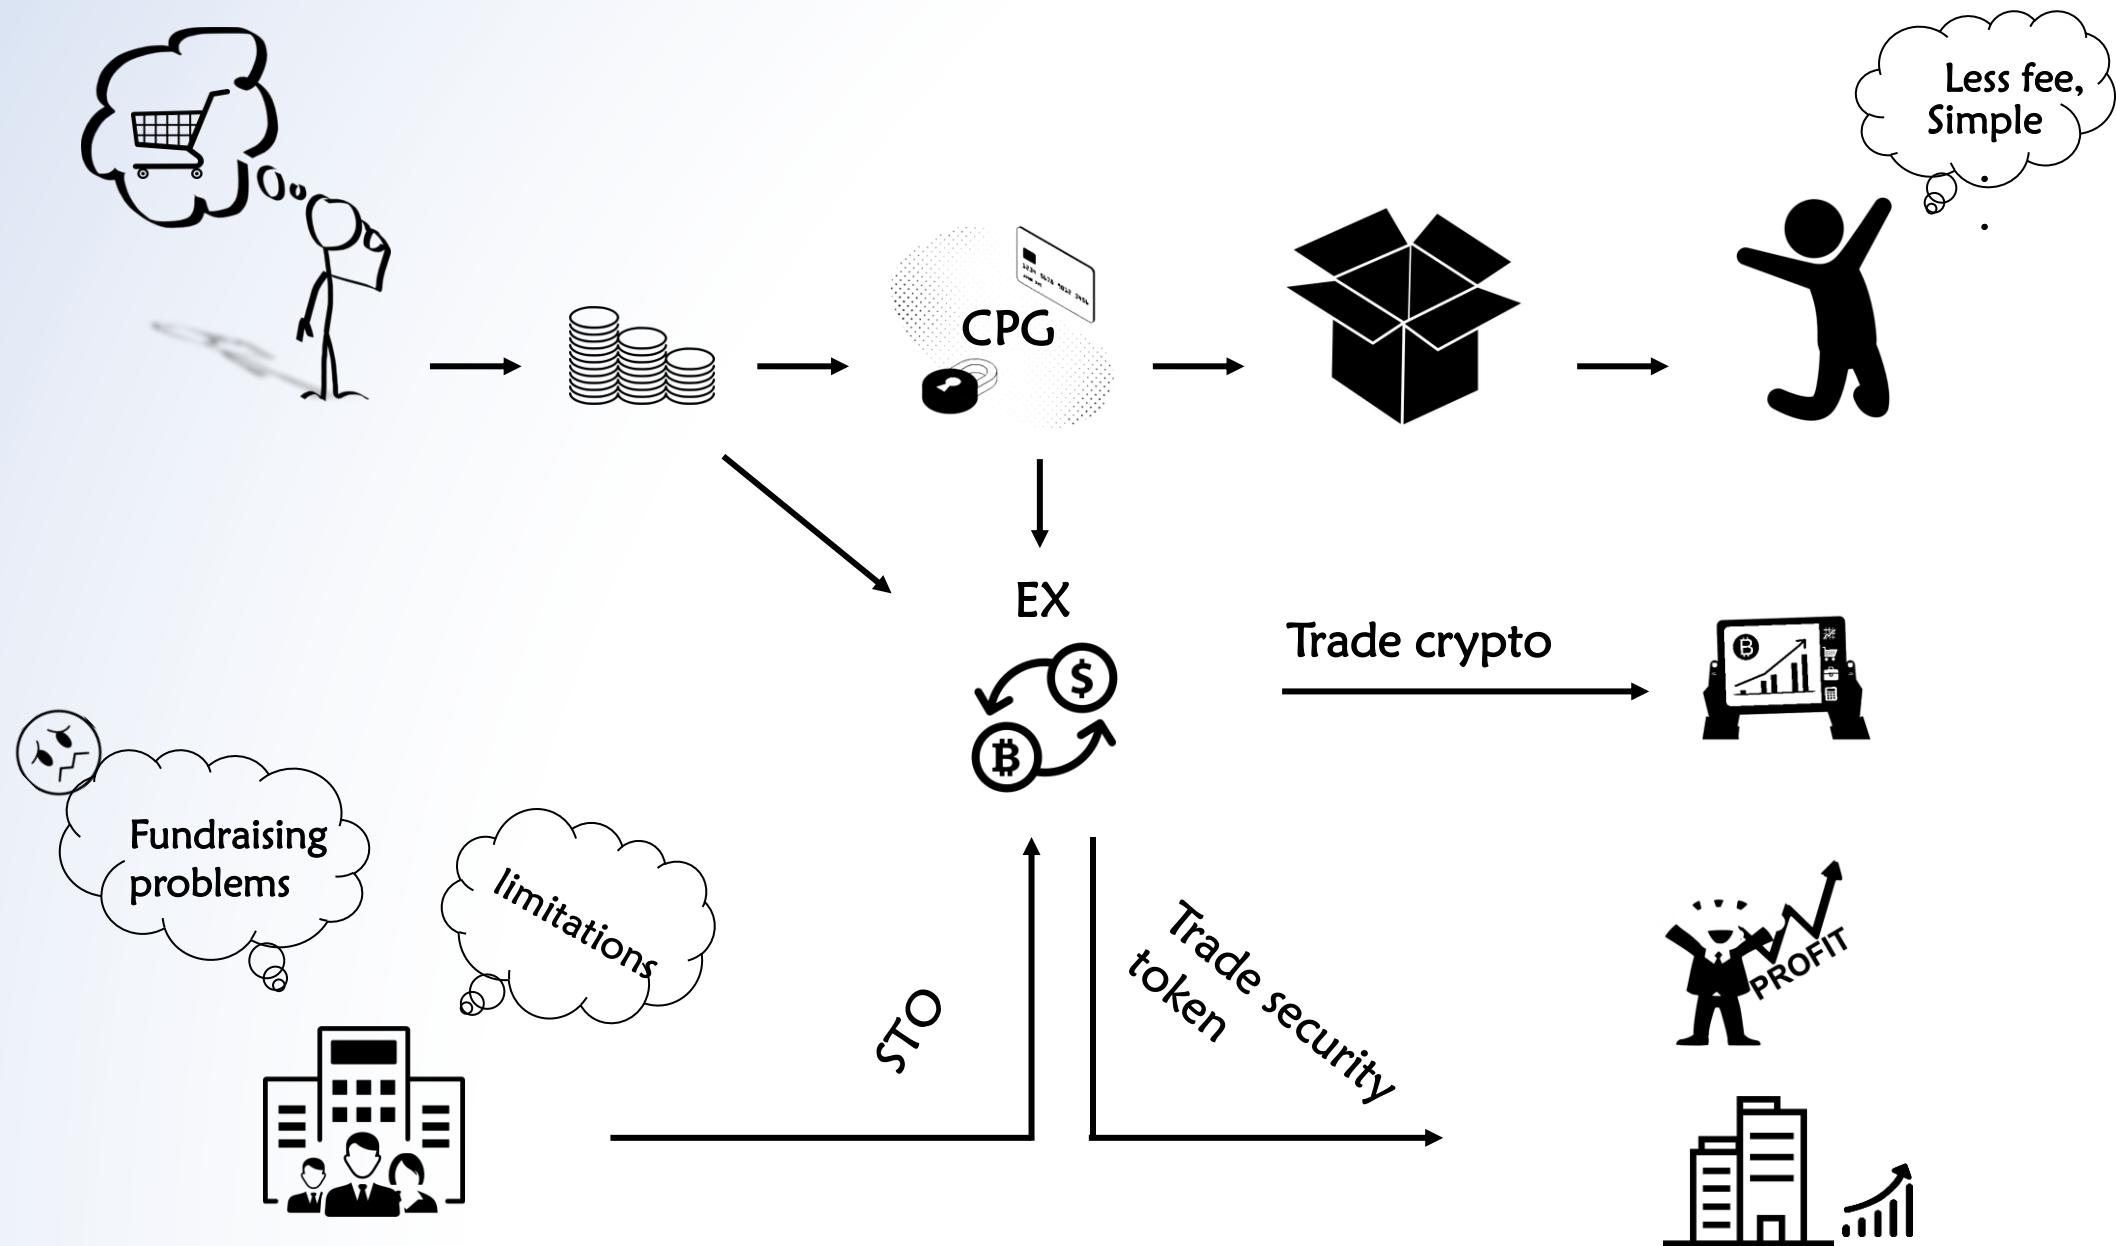

- Crypto Wallet
- Decentralized Crypto Exchange (DEX)
- DeFi Lending (No KYC Lending)
- Crypto Forex Broker
- Public Blockchain Network (MainNet)
- Escrow service for P2P trades

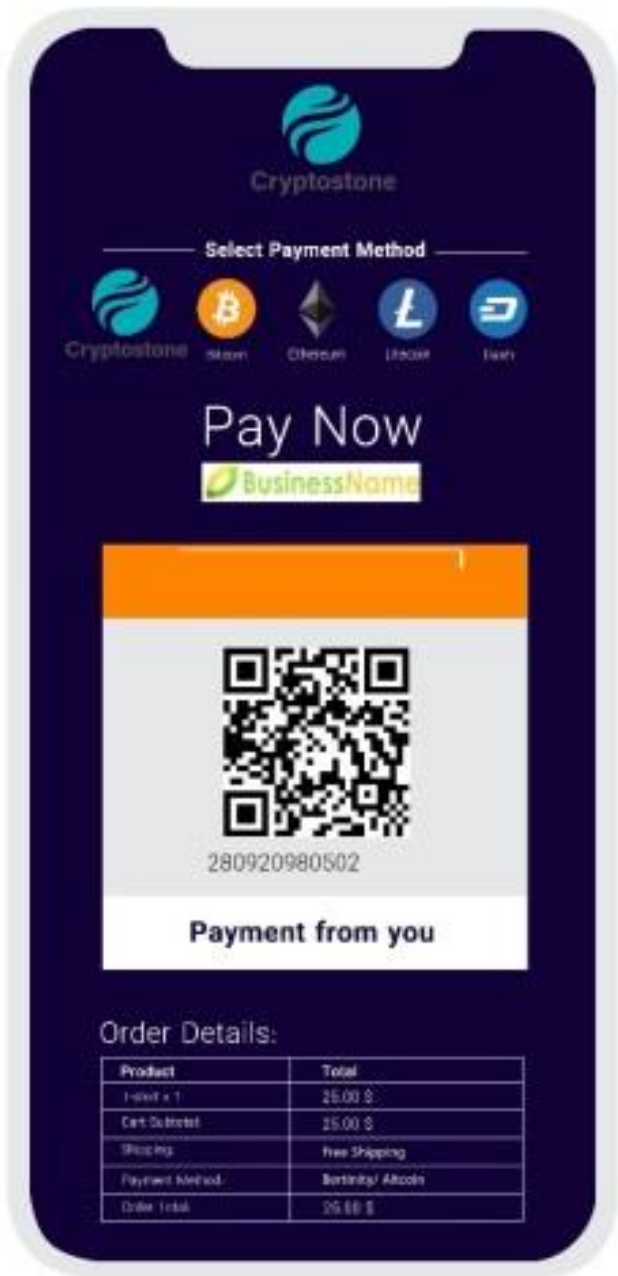

Crypto Exchange (No KYC CX):

Cryptocurrency and security token exchanges help better trading experience

How it work :

CPG Prototype:

Market size :

Global Bitcoin payment:
\$27M

STO: \$200B

Exchange : CEX: \$2.31T, DEX: \$319.1 B

CryptoMarket Cap: \$1,627 B

0.1%

\$ 77 M

CAGR: 56 %

1%

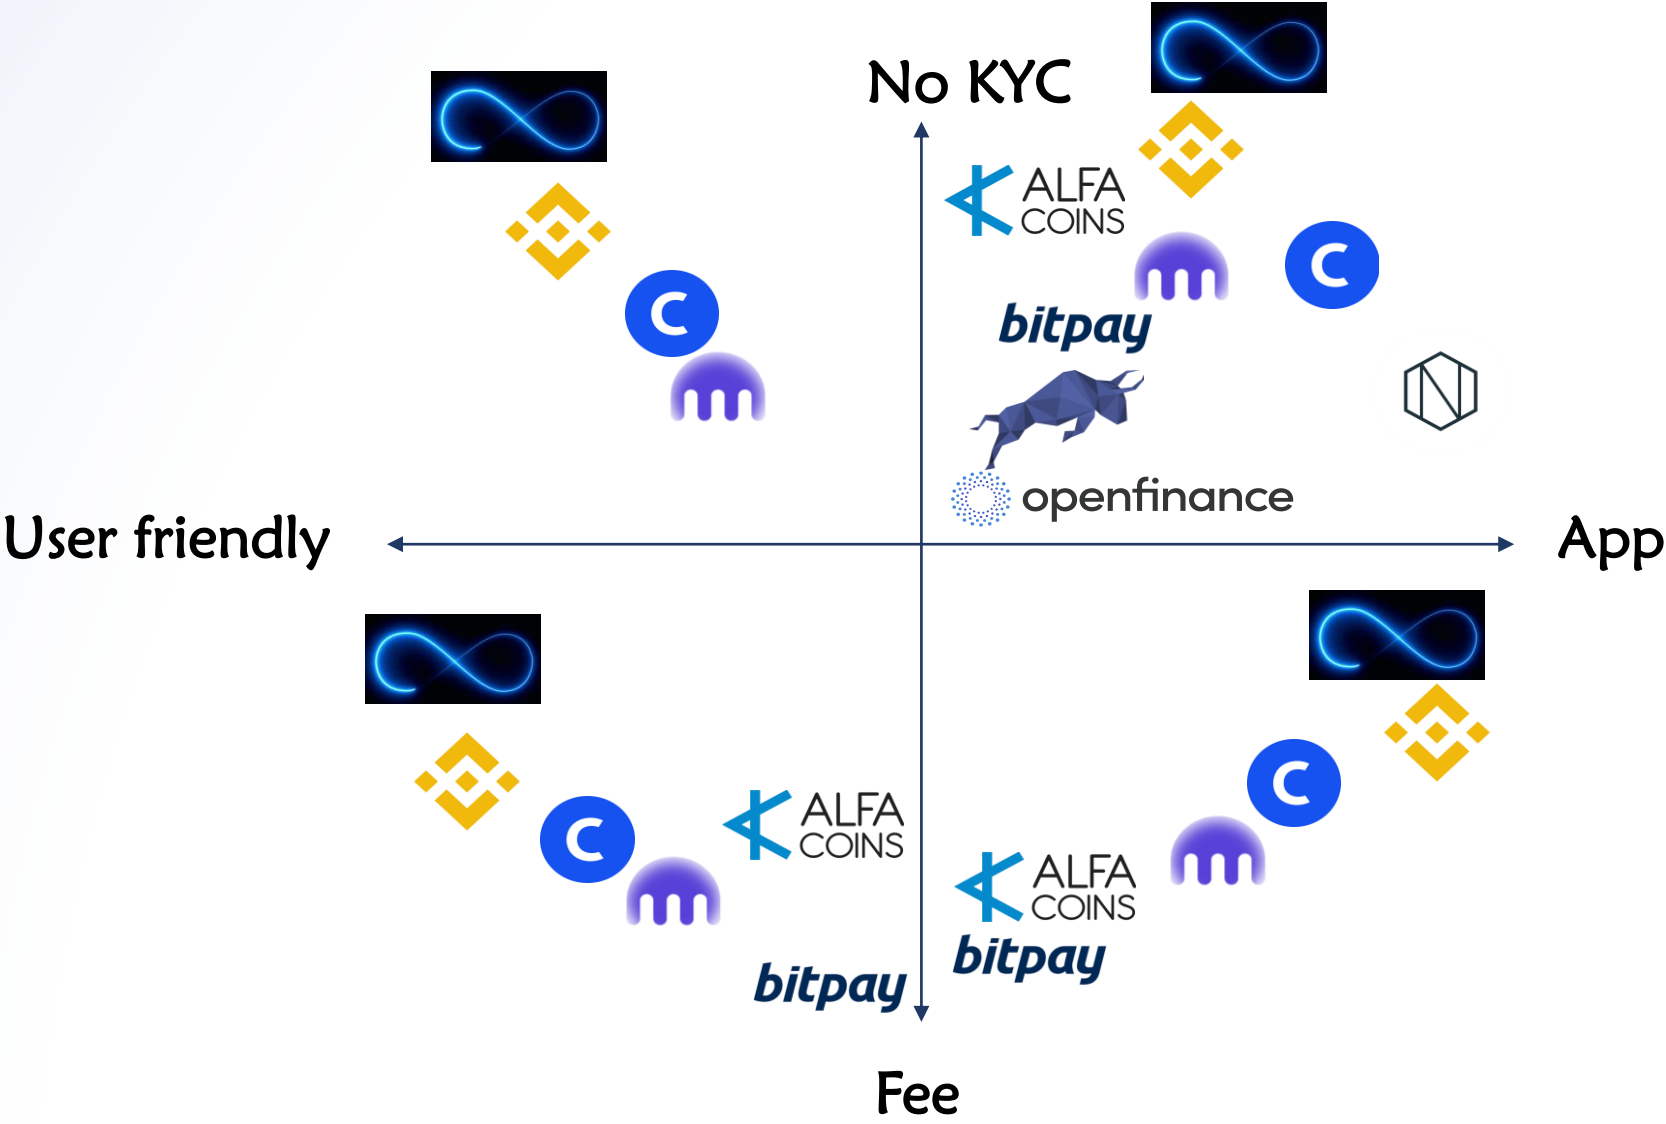

5 year vision:

\$1.21B

Market map

Competitor analysis:

 Cryptostone

Revenue Model:

Security Token / ICO Platform:

- Stock security token listing fee
- Stock security token offering fee
- Security token trade commission

Coin:

- Future coin value (increase)

CPG:

- Transaction fee
- Exchange fee
- Coin accepting fee

Exchange:

- Exchange fee
- Coin listing fee

Core value

Our users can enjoy the benefits of blockchain technology and can access global financial services in a decentralized world without the intervention of decision-makers, banks, and the government, freely and without legal enforcement with maximum speed and reliability.

We intend to bring blockchain-based services into people's life by creating a blockchain ecosystem and we try to turn cryptocurrency from asset to payment tool

Competitive Advantages:

Complete financial ecosystem and full stack service cycle

No-border financial, payment and investment services

Special focus on more than 2bn unbanked and underbanked

Fast-growing financial ecosystem due to the absence of cumbersome legal restrictions

Ability to exchange cryptocurrencies, assets and security tokens on an integrated platform (without KYC)

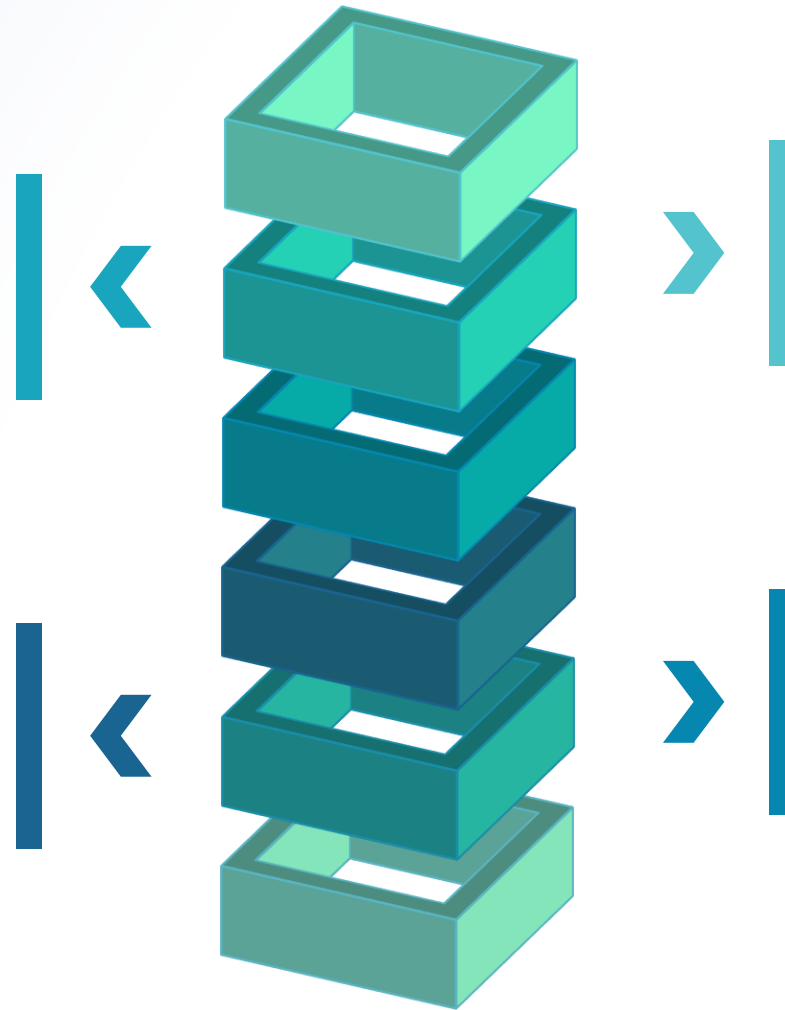

No KYC and anonymous ecosystem

Anti fraud tagging system

Value proposition of Cryptostone financial ecosystem:

- Faster and simpler services
- Transparency
- Lower costs

- Absence of cumbersome and restrictive rules enforced by governments and banks

- Protection of privacy
- Availability, accessibility and better usability
- Economic freedom
- Removing intermediaries
- Decentralized without centralized decision-makers such as administrators and banks (Self-regulated services by blockchain consensus)

Our Differences (1)

1. What are differences between us and Bitcoin?

Bitcoin is a blockchain network and a coin but we are a blockchain financial ecosystem

2. What are differences between us and Ethereum?

Ethereum is a modern blockchain network and a coin but we are a blockchain financial ecosystem

3. What are differences between us and the Binance and Binance Smart Chain?

Binance is a crypto exchange and a coin and BSC is a modern blockchain network but we are a blockchain financial ecosystem

What are differences between us and a bank or a stock exchange?

- a) We are fundamentally different.
- b) We are decentralized and our services are anonymous(No KYC).
- c) We are against governments, banks, and stock exchanges.

Find 5 differences

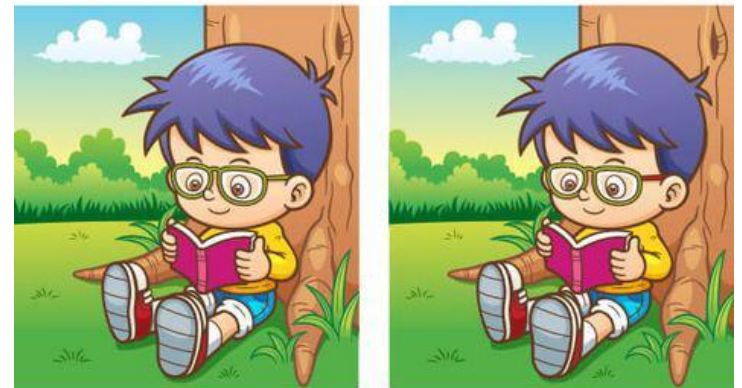

Our Differences (2)

What are differences between us and other blockchain financial ecosystems?

1. We are Crypto-Anarchist.
2. Our focus is on our own theoretical fundamentals.
3. Our focus is on more than 2bn unbanked and underbanked.
4. Our focus is on utilizing blockchain technology as a financial tool in people's lives.
5. We are fully Anonymous and No KYC.
6. We are a complete financial ecosystem and full-stack service cycle.
7. We are the first Decentralized Worldwide Security Token Stock Market.
8. First-ever borderless investment or fundraising platform for share capital of real companies

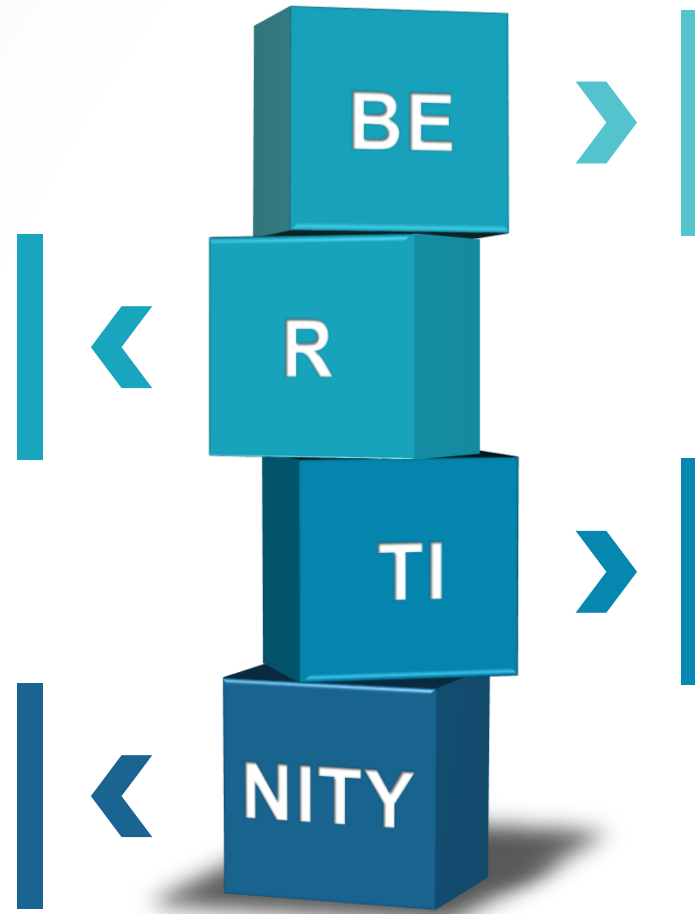

Find **5** differences

Cryptostone features:

- Security token and stock trade commission discount
- Acceptable on Cryptostone payment gateway

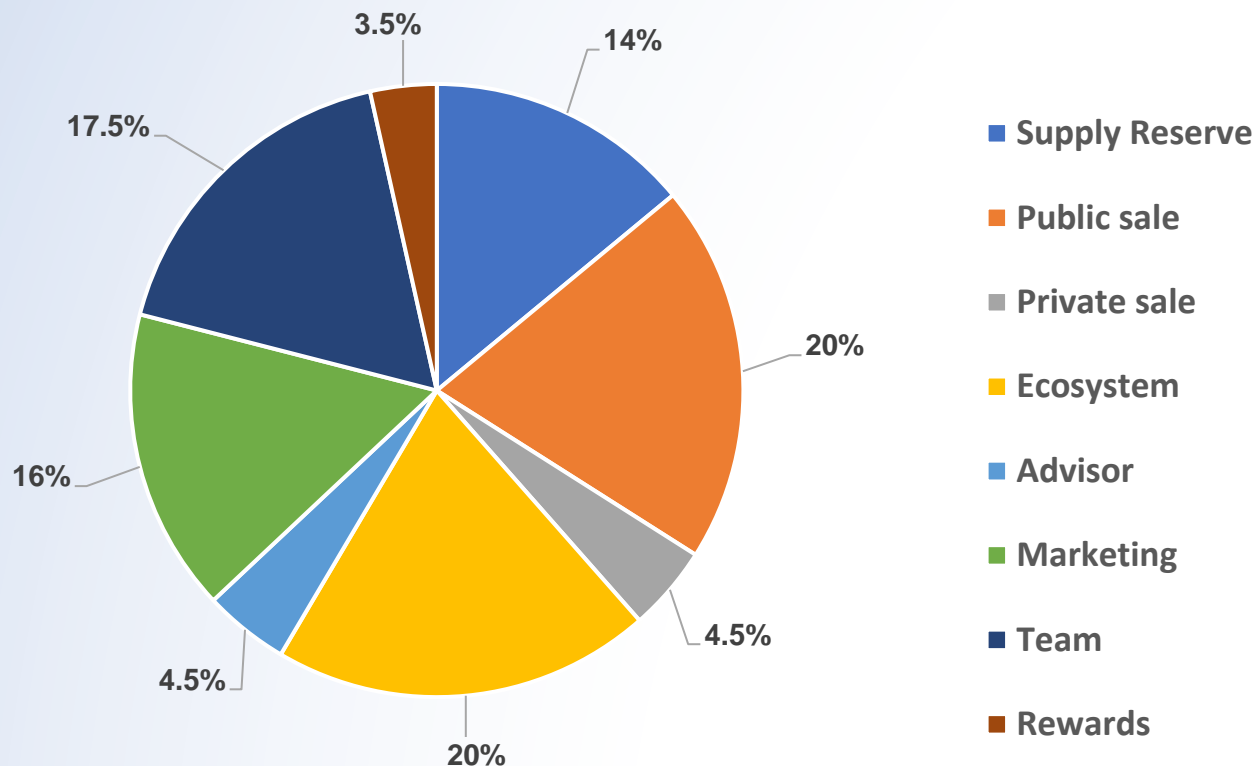

- Ability to be listed on Cryptostone and other trusty exchanges
- Discount on purchases or trades in the ecosystem

- Cryptostone Exchange fee discount
- CPG transaction fee discount

- Potential value increase due to project growth

Token Supply (Tokenomics)

Fund Needed:

- **Soft cap:** \$908,000
- **Hard cap:** \$7,181,000

Our Fundraising Methods:

- **Private Placement**
 - VCs
 - Angels
- **ICO** (ICO,IEO,...) **and Token pre-sale**

Multi Phase Initial Coin Offering (ICO) Mechanism:

Cryptostone Token (CPS)

Binance Smart Chain

- Number of phases: 50
- CPS price increase per phase: 10%

- First Phase Cap: \$5,000
- Last Phase Cap: \$660,000

Phase	USD (Investment)	1 CPS2 (USD)
Phase 1	\$5,000	\$0.000033
Phase 2	\$6,000	\$0.000037
Phase 3	\$7,000	\$0.000040

Phase 49	\$600,000	\$0.0032
Phase 50	\$660,000	\$0.0035

Project Funding:

Why we need private placement:

- To accelerate and increase the chances of successful ICO.
- To help cover pre ICO costs such as HC, DM, Media, Video, Listings, Consultation, etc.
- To build initial community.

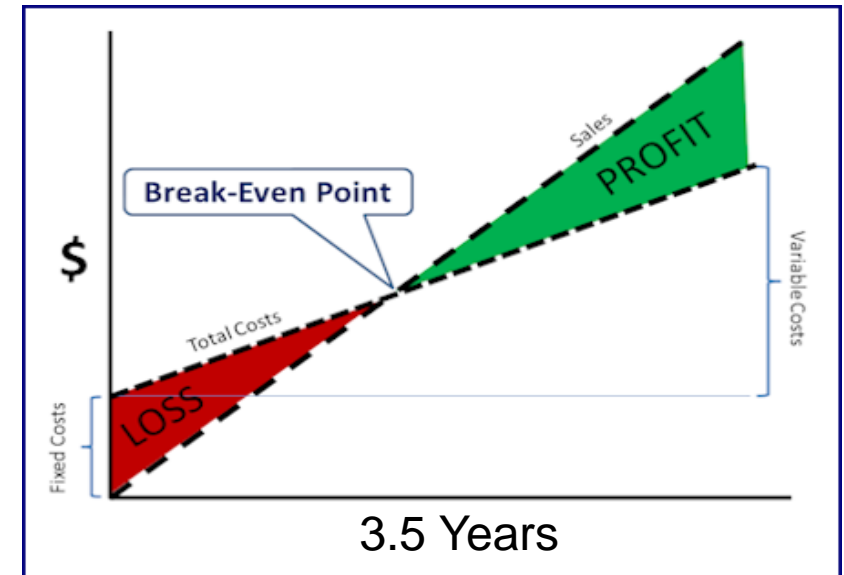

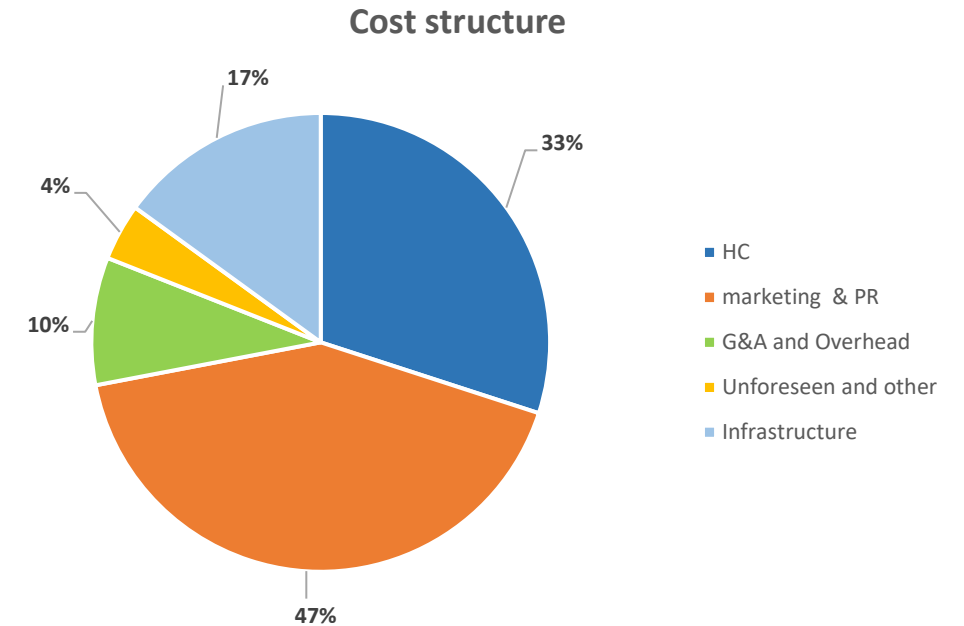

Our ICO_(ICO,IEO,...) plan:

- Bounty program
- Airdrop
- Pre sale program
- Social media activity
- Blockchain specialized forums activity
- Digital marketing campaigns and native ads
- ICO listings
- Media reportage
- Affiliate programs
- Standard website and introduction video
- PR

Cost structure:

Cost Structure:

- **HC**
 - Production (Core, Backend, Frontend, Website, Applications)
 - R&D
 - Consultation
- **Digital Marketing**
- **Media**
- **PR and Events**
- **Infrastructure, Equipment and Supplies**
- **Hosting and Datacenter services**
- **Sales and Marketing**
- **G&A and Overhead**
- **Unforeseen and other**

Community building:

Our community building strategy:

- Airdrop
- Advisor
- Bounty program - rewards
- Social media activity
- Airdrop Listing (accounts, site, tg group, tg channels)
- Digital marketing campaigns
- ICO (ICO, IEO, ...)
- ICO listings
- Forex services
- CPG services
- Media reportage
- Affiliate programs
- Online events
- PR
- SEO
- Network distribution

Network distribution strategy:

- Rewards
- Bounty program
- Social media activity
- Blockchain specialized forums activity
- Digital marketing campaigns
- Media reportage
- Online events

Cryptostone Decentralized World-wide Security Token Stock Market:

	Basic Level Market (BLM)	Rapid Entry Market (REM)	Premium Enterprise Market (PEM)
Initial Due Diligence	No	Yes	Yes
Admission	No control	No control	Blockchain Consensus
Risk	Medium to High	Medium	Lower
Initial Due Diligence Fee	No	10.000 \$ – 50.000 \$	10.000 \$ – 50.000 \$

Cryptostone Decentralized World-wide Security Token Stock Market opportunities:

Why token publishers love us:

- They don't like local markets, because of their cumbersome, slowing, and restrictive rules
- Fundraising from a multi-billion market
- Supply in a global market instead of a local market
- Use of international marketing capacity
- Low capacities and potentials of local markets
- Low liquidity of local markets

Why investors and participants love us:

- They have been exiled from the world markets
- Investment across borders (Capital knows no borders)
- Ability to invest in a variety of projects around the world
- More investment opportunities
- A variety of annoying local taxes
- Equal right to invest
- Protecting privacy

Cryptostone CPG opportunities:

Advantages of Using Cryptostone Cryptocurrency Services for Merchants (Beside traditional Services)

- ✓ Lower Transaction Costs
- ✓ Attract New Customers
- ✓ Immediate Availability
- ✓ Eliminate Chargeback Fraud
- ✓ Safe and Secure
- ✓ Can be used beside traditional payment services to attract more customers (Unbanked or Underbanked)
- ✓ No intermediary banks
- ✓ No Cross-border payments restrictions, limitations and sanctions

Reasons to Choose Cryptostone Payment Services for Merchants (Beside traditional Services)

- ✓ Enable Global Cryptocurrency Transactions
- ✓ Merchant & Enterprise Account Types
- ✓ Lowest Industry Fees
- ✓ Ability to Convert Cryptocurrencies
- ✓ Crypto-Crypto and Crypto-Fiat Withdrawals
- ✓ Over 100 Coins, Tokens and Stable Coins Available

Cryptostone CPG opportunities:

Advantages of Using Cryptostone Cryptocurrency Services for Users

- ✓ User can Protect Their Privacy
- ✓ Safe and Secure
- ✓ Unsafe Merchants can't steal user's Money
- ✓ Users with no CreditCard (Unbanked or Underbanked) can use this service
- ✓ Ability to choose more currencies than traditional
- ✓ No intermediary Banks

• Via DeFi

Cryptostone ecosystem opportunities:

7 Ways Cryptostone Helps Businesses Accelerate Digital Transformation:

1. Blockchain as the Standard for Digital Transactions
2. Blockchain as an Accelerator of Business Processes
3. Blockchain as a Game Changer in the Supply Chain
4. Blockchain as the Architecture for Connectivity
5. Blockchain as a Platform for Smart Contracts
6. Blockchain as Fuel for the Finance Function
7. Blockchain as a Success Factor in Competition

5 Ways Small Business Can Benefit From Cryptostone :

1. It's a new form of payment
2. It provides safer and cheaper cloud storage
3. Businesses can leverage smart contracts
4. Businesses can use it for capital raising
5. Paying employees in cryptocurrency

Cryptostone Ecosystem Comparison Table: (Ecosystem Competitor Analysis)

Feature / Utility	Other Projects	
Blockchain Technology	  	
Proof Of Stake	  	
Fully Anonymous (No KYC)	  	
Smart Contracts	  	
Crypto Payment Gateway	  	
Anti-fraud labeling system		
DeFi Lending Platform (No KYC Lending)	  	
Decentralized Worldwide Security Token Stock Market	N/A	
Decentralized Crypto Exchange (DEX)	  	
Centralized Crypto Exchange (No KYC CX)	  	
Crypto Forex Services	  	
Crypto Wallet	  	
Tokenizing assets	  	
NFTs	  	
Escrow service for P2P trades	N/A	
Low costs		

Some potential utilities of Cryptostone blockchain network:

HealthTech

Distributed blockchain storage

Identity verification

Defi Services

AgriTech & Foods

IoT
